Director at ProActive Networks

What Our Customers Say About Us

The British Theatre Dance Association has been connected with Complete Communications for over 15 years. During our relationship they have supplied and maintained our telephone systems ensuring that we can keep connected with our customers. Their advice, recommendations and on-going support have been invaluable.

”

Helen Mence

British Theatre Dance Association

We have used Complete Communications for a number of years. We have three branches and use them in all of our offices. I have always found them to be knowledgeable, professional and speedy in their response when issues have arised. Their staff are courteous and helpful, and go the extra mile with their customers. Five stars from me!

”

Susan Palmer

The Network You Can Trust

Our server clusters are located across the UK data centres. The primary data centre is London Volta, offering industry-leading resilience for connectivity, power and cooling, and is a co-location centre of choice in the heart of the City.

We run load balanced controllers and hosts across our advanced Linux Based Dell server clusters, providing additional backup, and we connect to the PSTN using direct SS7. Our IP traffic flows directly over uncontented links, and we peer extensively over LINX and LonAP as well as privately, ensuring our traffic is handed to other ISPs locally wherever possible.

Our customers need a phone system that goes above and beyond traditional PBX capabilities, with the ability to move freely without interruption. With VoIPSure, you can efficiently work from the office, home, or on the move, using a desktop or mobile application. Now you can stay in touch with colleagues, drive sales, increase productivity, and keep projects running wherever you are, on whatever device you choose.

- ✔ Instant messaging, video and group chat included
- ✔ Full CRM integration with leading CRM platforms
- ✔ Call recording with no charges for storage
- ✔ Voicemail to email with transcription
- ✔ FAX to email
- ✔ Click-to-dial & hot desking capability
- ✔ Skype for business & Outlook integration
- ✔ 246 party conference bridge

VoIPSure Hardware

Whether your business is a busy call centre of 500+ people, or a small company of less than 5 people, it is crucial that you have a hardware solution tailored to your business' specific needs.

VoIPSure collaboration platform is best suited to Yealink hardware. The Yealink products that we provide are excellent in quality and feature-rich, with rapid technical support and auto-provisioned. From the award-winning Yealink range, we offer a selection of desk and cordless DECT phones.

Your business can opt-in for traditional IP desk and DECT phones and conference devices or even, use existing phones (subject to hardware compatibility).

Yealink

Yealink Prime Business T53

Enable productivity-enhancing communications. The T53 desk phone brings versatility to business communications, improving efficiency and productivity.

Designed for busy business professionals, the Yealink T53 handset is a powerful and expandable office phone that delivers optimum desktop efficient and productivity.

The user friendly design allows you to adjust the LCD screen to easily and flexibly find the comfortable viewing angle according to your personal and environmental needs. As for the audio quality, coupled with the latest version of Yealink Optimal HD Voice technologies, the handset can effectively eliminate background noises, to deliver crystal clear voice even in a distracting environment.

The Yealink T53 desk phone not only furnishes you with Bluetooth connectivity, including Bluetooth headsets and mobile contacts synchronisation when working with Yealink Bluetooth USB Dongle BT41 (sold separately), but also with WiFi connectivity when used with the Yealink WiFi USB Dongle WF40/WF50 (sold separately).

Yealink Prime Business T53

Key Features

The Yealink T53 is a powerful and expandable office phone that delivers optimum desktop efficiency and productivity. A built-in USB 2.0 port allows you to enjoy USB call recording via USB flash drive (not included).

The benefits of this Prime handset will help you to keep up with the modern telecoms technology, ensuring your business doesn't fall behind in the coming years.

Yealink Cordless W60P & W56H

Enabling quick user adoption and smart integration into the working environment, the W60P is a premium cordless phone, ideal for businesses that require greater capability to handle a heavy call load.

The Yealink W60P, being a high-performance SIP cordless phone system, is the ideal solution for small and medium-sized businesses. Pairing with up to a total of **8 Yealink W56H DECT handsets**, it allows you enjoy superb mobility and efficient flexibility immediately.

To provide a better and higher performance, this DECT IP phone not only supports up to 8 VoIP accounts and 8 concurrent calls, but also speeds up its startup and signal connection, slashes its upgrade downtime as well.

By supporting Opus codec, W60P consistently delivers excellent and professional audio quality in both high-bandwidth and poor network conditions. Offering the convenience of cordless with a simple add-on device without losing the SIP features, it brings a seamless call management for our users while “on-the-go”.

Yealink Cordless W60P & W56H

Key Features

The Yealink W60P & W56H cordless phone systems combine quality, reliability and flexibility to offer users a scalable, efficient communications system.

This system is the ideal solution for any small to medium sized company where employees need to handle calls away from their desks or moving around the premises.

Contact Centre Solution

VoIPSure Contact Centre solution is the high-performance call centre solution. With the full feature set of our Business Collaboration App, this plan offers two variations in permissions levels, providing more control over tasks.

VoIPSure is built for call centres, with features that are transferrable and useful for businesses who need a secure system to manage their team efficiently.

VoIPSure Contact Centre offers users exceptional levels of customer service at the same time as enhancing Agent productivity. Fully scalable, VoIPSure offers real-time monitoring and queue stats while providing additional levels of management and administrator control.

Contact Centre Solution

Key Features

VoIPSure Contact Centre's innovative features can be leveraged to better meet your business or call centre's needs.

From real-time queue stats to managed control, your business will gain a competitive edge in their industry. VoIPSure Contact Centre provides the functions allowing you to improve your approach to customer interactions. For sure!

Unlimited ACD queues. A sophisticated queuing solution to help keep customers on the line

Soft phone. Adopt desk phone or soft phone or toggle between both

Call agents. Responsible for handling specific services efficiently

Wallboard. Provide targeted updates for all your Agents in seconds

Comprehensive reporting. Improve campaign success with reporting and analysis

Managed control. Control of agent behaviour and supervisor intervention

Real time queue stats. View what is happening in real time to improve your call strategy

Scalability. Fully scalable according to size and complexity

Real time monitoring. Act on real time information during every call

Contact Centre Solution

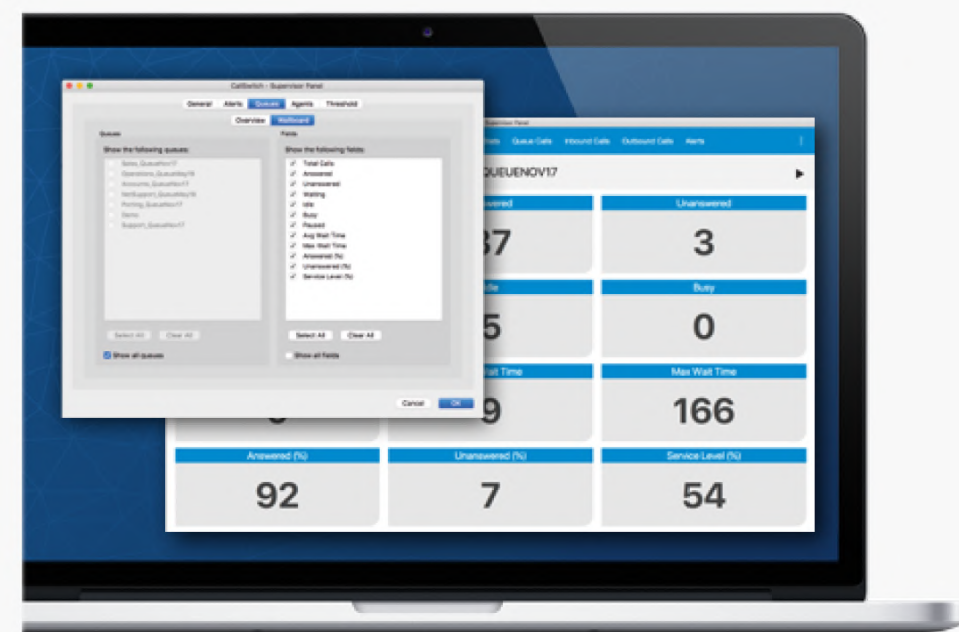

VoIPSure Wallboard

Our wallboard provides simple, targeted information of all of your agents in seconds. They help keep supervisors up to date with situations as they develop while allowing agents to remain focussed on the job at hand.

Our VoIPSure Supervisor Edition provides detailed personal wallboard on the user's desktop. The data presented can be selected, and the screen will scroll to show multiple queues.

Multiple supervisor roles are also available, allocated by the supervisor and toggle their access to the Agent Edition.

VoIPSure Real-Time Agent Monitoring

This feature helps managers oversee and track agent calls as they are carried out to act on real-time information during every call.

VoIPSure Analytics tool is used to track agent attainment, oversee calls between customers and agents, and deliver fast, efficient performance feedback. The supervisor can receive alerts from agents seeking assistance and then monitor or intervene on the call.

A rolling graph shows accumulated call and agent performance for the day. It includes functionality to monitor and manage needs and performance, plus allows supervisors to receive escalated calls.

VoIPSure Compliant

VoIPSure Compliant is an add-on to our Business plan. It allows your business to see how employees are communicating with customers. If your company needs to record calls and take payments over the phone, we can provide you with the perfect compliance-ready solution.

Fully MIFID II and PCI Compliant, designed to be operational in minutes. An intuitive web interface makes it easy to navigate through calls and playback, with features available from a single screen. With just a simple tutorial, your business can be up and running without losing valuable staff time to training.

- ✔ Voice Recording
- ✔ Screen Capture
- ✔ Employee Evaluation
- ✔ Employee Training
- ✔ Employee & Supervisor Notes
- ✔ Compliance Support
- ✔ Call Tagging
- ✔ Call Detail Information
- ✔ Payment Platform Integration

Record using our award winning technology

Encrypt with compliant 256 bit encryption

Store using Microsoft Azure Cloud storage

Retrieve with our easy to use HTML5 interface

Evaluate your agent easily in minutes

API to easily integrate into your payment platform

VoIPSure Communicator Editions

VoIPSure Agent Edition

With VoIPSure Contact Centre, our Communicator is offered in two varieties: Agent Edition and Supervisor Edition. They are designed to maximise workflow and efficiency of both call centre Agents and Supervisors.

On Communicator Agent Edition, agents sign to become active in a queue. An agent may set Pause Status, giving a 'pause' reason. The Agent Edition also displays other selected agents' status in their group and calls waiting in the associated queues.

VoIPSure Supervisor Edition

Our Communicator Supervisor Edition is a real-time hub for monitoring and managing calls and agents.

It displays real time call and agent status and allows the supervisor to 'enable' and monitor agents. The supervisor can receive alerts from agents seeking assistance and then monitor or intervene on the call.

Also, multiple supervisor roles can be allocated and a supervisor can toggle their access to Agent Edition.
